The **MMT TouchWall** is an interactive, modular videowall solution based on state-of-the-art technologies. Thanks to the **large active area**, multiple users can access the interactive media contents **simultaneously**. There are no limitations - any company, product or service can be advertised and presented using the MMT TouchWall.

Designed and built after years of testing, constant improvements and experience on the field, the advanced MMT modular system is easy to transport and assemble. The **light-weight construction** is fully made from aluminum and can be powder-coated in any RAL color. It's available as **free-standing solution or mounted to a back wall**.

With a diagonal size of **up to 500"**, it's the ideal device for amazing presentation for any type of use in stores, exhibitions, events or in museums.

The **advanced MultiTouch sensor** is able to recognize **up to 40 touch points simultaneously**, with an incredible accuracy

of 2.7mm. It also comes with an additional protection against light interferences (upon request). The toughened, **ultra-clear safety glass** features an anti-glare treatment on both sides in order to avoid any reduction in the image quality and brightness.
