

 Your world connected

Pexip Infinity: Simplified enterprise video communication

An award-winning cloud enterprise application that enables enterprise-wide video conferencing and collaboration using any device or platform.

Pexip Infinity seamlessly connects enterprise communications and collaboration solutions in Virtual Meeting Rooms, or operates as a gateway between platforms. Meeting participants can join meetings with any communication or collaboration device or tool of their choice: traditional videoconferencing, Microsoft Teams or Skype for Business, Google Hangouts Meet, personal and mobile devices, telephones, or simply any web browser.

Meet

Meet colleagues, partners, and customers face to face whenever, wherever.

Collaborate

Enable your team to collaborate across technology barriers and silos.

Build

Custom build your ideal deployment with base platform, interop and Virtual Meeting Room components.

Key features:

- Designed for cloud deployment, runs anywhere
- Award-winning and certified interoperability for video conferencing, Microsoft Teams, Skype for Business, Google Hangouts Meet, WebRTC, audio, and more.
- The only certified solution for Google Hangouts Meet video interoperability.
- Microsoft certified video interoperability solution for Microsoft Teams and Skype for Business
- Native VMR scheduling for Microsoft Exchange and Microsoft365
- Native content sharing between all supported platforms
- Provides everyone in any size organization with enterprise quality video, audio, and content conferencing.
- Enterprise-wide branding capabilities included as standard
- Microsoft Azure, Amazon Web Services, and Google Cloud Platform deployment options, plus countless others
- SIP, H.323, and Infinity Connect client registration and call control
- Simple and easy licensing, managed from a single console
- Scalable to any number of participants
- Simple to deploy, manage, and use

About Pexip

At Pexip, we believe that everyone should be able to join a video meeting regardless of their job title, device or location. The founders of Pexip foresaw that there would be a movement in video conferencing from hardware to software and from software to cloud, and knew that with the right engineering and application, we could develop a platform to help enterprises benefit from these transitions.

This is why we have developed Pexip Infinity. No matter the size or locations of your organization, Pexip Infinity provides a flexible, scalable meeting platform that fits your global team.
